Module 1: Accessing Altium 365

1.1 Purpose

This exercise is about the signing into Altium Live and the Training Workspace.

1.2 Important notice

Please note that the Training workspace will only be accessible during the training. Once the training is completed, you will no longer have access to the Altium Training Workspace. It is important to avoid uploading any personal files, projects, or any other materials to the Altium Training Workspace.

Some of the functions you see during training are configurable by Preference settings. We recommend using an Altium Designer installation without modified settings for this training. If possible, install a parallel installation of Altium Designer, to use only during the Training.

A separate Installation will prevent unintentional changes to your company preference settings in your central installation.
